International Diabetes Federation

Promoting diabetes care, prevention and a cure worldwide

International
Diabetes
Federation

The diabetes epidemic

- 250+million cases (c380 million by 2025)
- 3.8 million deaths p.a. (AIDS 2.6 million)
- every 30 seconds a limb is lost

Diabetes is more than just a risk factor for cardiovascular disease.

International Diabetes Federation

205 member associations (and rising) in
160 countries

US 500 million in combined income and over a
million individual members

Works from local to global

Federation

Campaigning

world diabetes day

14 Nov

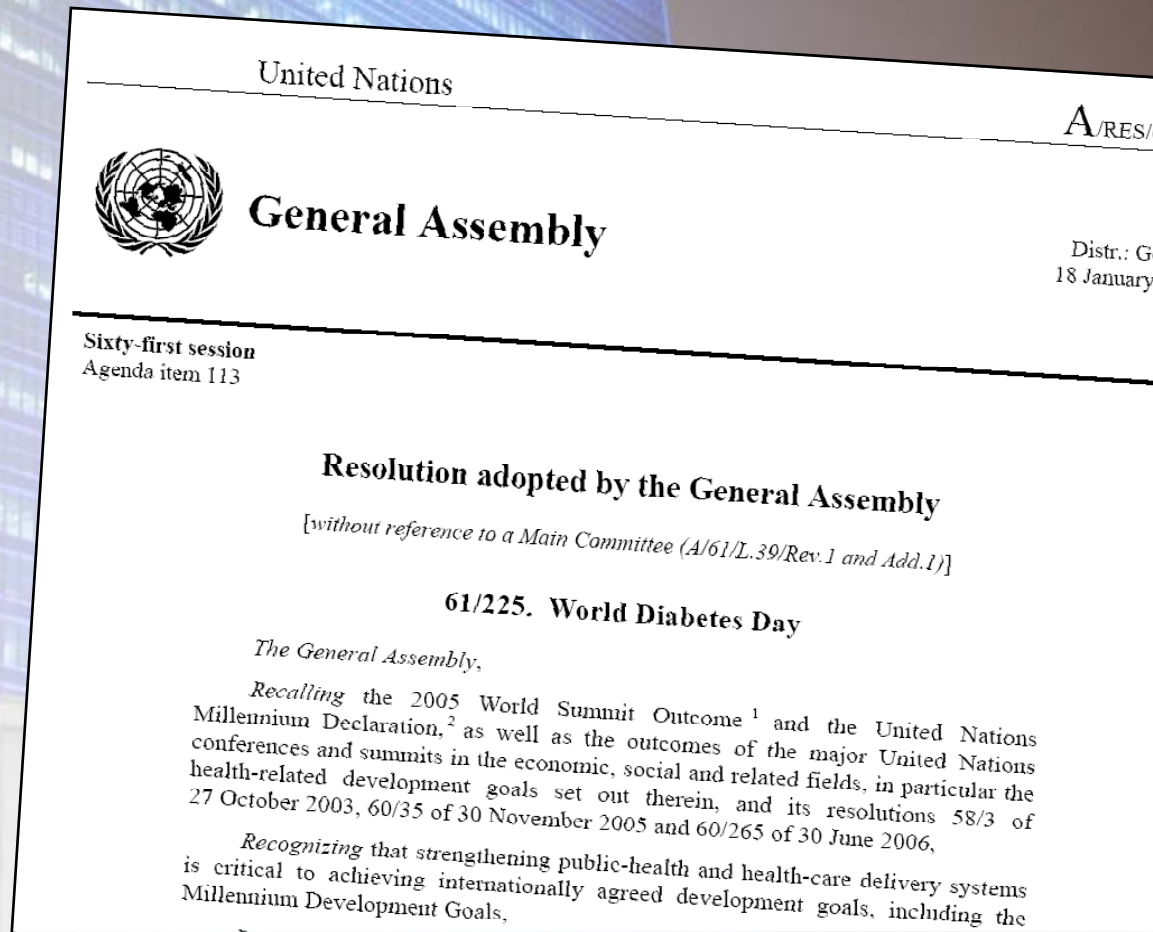

Over 1100 monuments in blue
Extensive grass roots participation
More children receiving care
Global media coverage
Bring diabetes to light
Significant involvement online

Advocacy

A United Nations Resolution on diabetes

United Nations

A/RES/

General Assembly

Distr.: G
18 January

Sixty-first session
Agenda item 113

Resolution adopted by the General Assembly

[without reference to a Main Committee (A/61/L.39/Rev.1 and Add.1)]

61/225. World Diabetes Day

The General Assembly,

Recalling the 2005 World Summit Outcome¹ and the United Nations Millennium Declaration,² as well as the outcomes of the major United Nations conferences and summits in the economic, social and related fields, in particular the health-related development goals set out therein, and its resolutions 58/3 of 27 October 2003, 60/35 of 30 November 2005 and 60/265 of 30 June 2006,

Recognizing that strengthening public-health and health-care delivery systems is critical to achieving internationally agreed development goals, including the Millennium Development Goals,

Going beyond the UN Resolution

NCDs/diabetes on the agenda

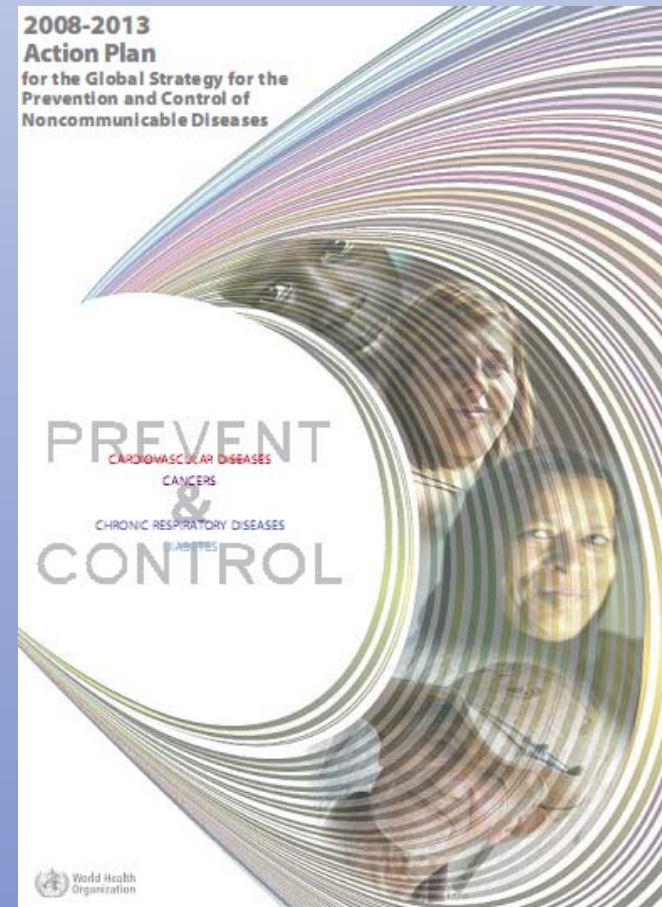

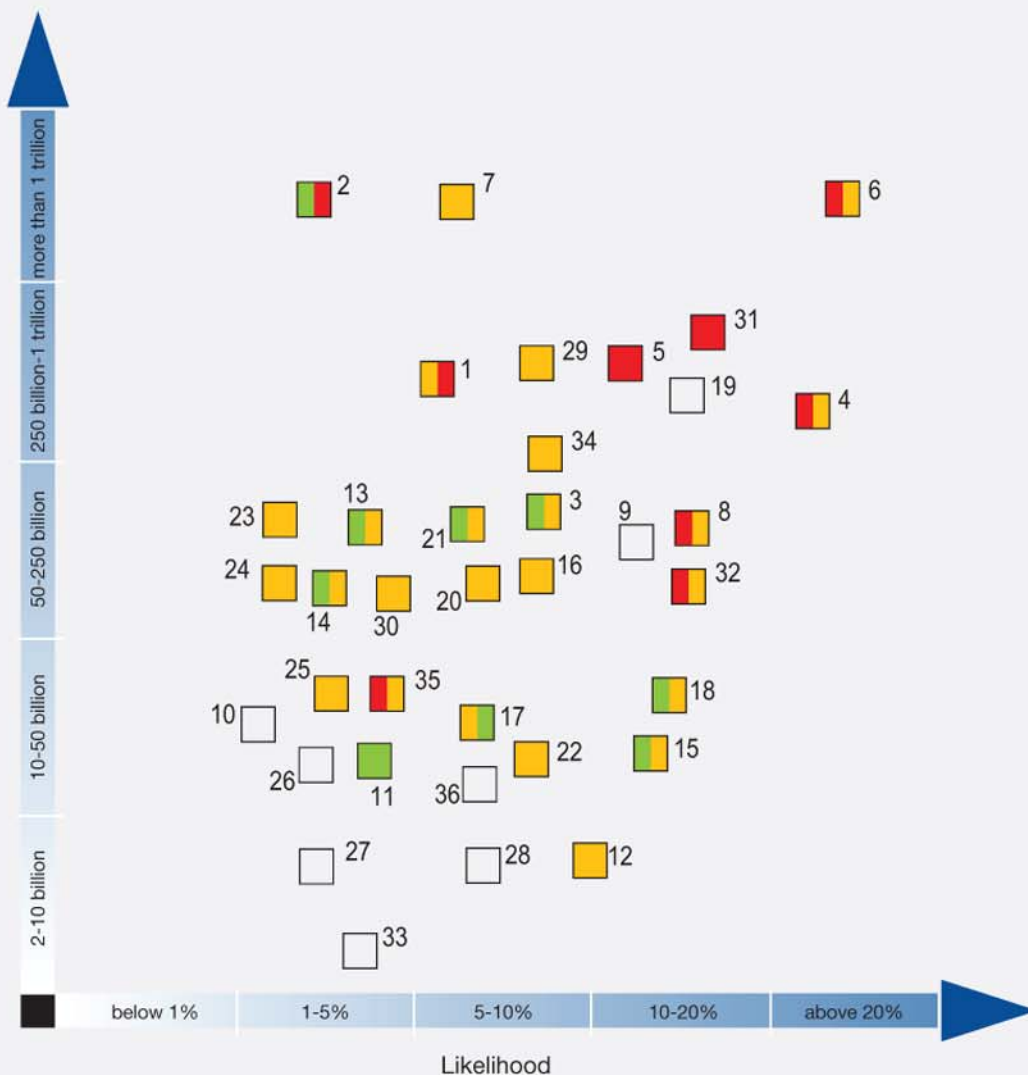

Figure 1: Global Risks Landscape 2009: Likelihood with Severity by Economic Loss

Based on an the assessment of risks over a 10 year time horizon by the Global Risk Network
 Key: Boxes indicate change since last year's assessment
 Increased (Red), Decreased (Green), Stable (Yellow), New risk for 2009 (White)
 Likelihood (Left), Severity (Right)

What gets a global health issue onto the international agenda?

Actor Power

The strength of the individuals and organisations concerned with the issue

Ideas

The ways in which those involved with the issue understand and portray it

Political Contexts

The environments in which actors operate

Issue Characteristics

Features of the problem

What do we want?

UN General Assembly Special Session on NCDs

UN Secretary General Special Ambassador on NCDs

Recognition of NCD impact for MDGs

International
Diabetes
Federation

And.....

Global Fund remit expanded

Prevention of diabetes and its complications/
integration of NCDs into primary health care

Access to essential medicines for diabetes

International
Diabetes
Federation

What else do we need?

NCD leadership and 'guiding institutions'

Common definition of NCD policy problem and solutions

Effective interventions

Civil society mobilisation: outrage and urgency

International
Diabetes
Federation

And we need to have.....

FAITH

*because global advocacy in health
can work!*

International
Diabetes
Federation
